

## Is there a generic equivalent for the brand-name drug I use? How much can I save?

For an example on how to find out if there is a generic equivalent for your drug, review the following screen shots from our Web site.

**1** To begin, visit [www.silverscript.com](http://www.silverscript.com) and select the **Budget & Plan Pricing Calculator** inside the **Quick Links** box.

**2** Select your state, for our example, we will use Arizona. Click on **Review available plans** to bring up the **Drug Coverage and Pricing Tool**.

**3** On the Drug Coverage and Pricing screen you will enter your brand-name drug.

For our example, we will choose Fosamax, a popular brand-name medicine used to treat osteoporosis.

After you enter your drug, you must click on **NEXT** to move to the next step.

After entering your drug information in Steps 1, 2, and 3 of this screen, click on **ADD TO LIST**.
